

Impact Learning Collectives

Our national, theme-based **Impact Learning Collectives** are an innovative way for mission-driven organizations to collaboratively learn, measure and evaluate towards effective systems-level change.

Overview

Systems-level change requires data-driven collaboration across lines (geography & demographics). In order to facilitate that type of collaboration, UpMetrics is launching nation-wide **Impact Learning Collectives (ILCs)**, whose purpose is to activate and inspire mission-driven organizations to become more effective with their impact measurement & management.

The learning environment will take on various forms, including online communities and expert speaker sessions, serving as sandboxes for folks to dive in, be inspired by peers, and grow awareness about best practices relative to leading impact work in thematic areas.

Impact Learning Collectives

Learn Amongst Peers

Discover new, innovative ways your peers are achieving success and navigating their impact data work.

Grow Relationships

Meet peers in the field and learn from other organizations across the United States that are working to drive change in the same topical issue areas.

Inspire New Ideas

Gain best practices on impact; hear from expert speakers who are practitioners; and learn through showcases from participating clients.

What are Impact Learning Collectives?

WHO

A group of clients at UpMetrics who are interested in growing their relationships, knowledge, and awareness of like-minded organizations tackling similar issue areas, and are interested in convening and contributing to a learning environment.

WHAT

The program provides clients with quarterly virtual learning and inspiration sessions, as well as an online community forum encouraging continued conversations and aiding in content sharing. Clients are offered the opportunity to join our impact learning collectives at no extra cost

WHY

The program will:

- Create space to learn towards success (quantitative and qualitative) across geography, issue areas and key stakeholders;
- Empower participants with new relationships; and
- Inspire participants with best practices from expert practitioners with proven success

Melvin Freeman
Sr. Director, Data + Strategy
Camelback Ventures

I co-hosted an Impact Learning Collective session with UpMetrics because it is so rare to find a space where impact measurement professionals can openly share both wins and challenges. UpMetrics created an incredible environment where funders and entrepreneurs could honestly discuss our measurement work – not just showcasing successes, but diving into real obstacles. This wasn't just a webinar; it was genuine collaboration where we could learn from each other's experiences and solve problems together.

Shape the Future of Impact Learning

Join us in 2025!

We'd love to hear from you! Contact us today to make sure you're on the list to get alerts about new ILCs or explore how we can create meaningful impact together.
